OUR FINANCIAL POLICY AND HOW IT WORKS

Insurance coverage varies greatly. Everyone has different insurance that normally changes on a yearly basis; therefore, we cannot predict whether your policy will cover the services we provide in our office. As a courtesy to you, we will do an insurance verification and contact your insurance company to determine the amount and extent of coverage. Regardless of your coverage, we will suggest the chiropractic care we think you need.

OUR RESPONSIBILITIES:

- We will verify your insurance benefits.
- We will bill your insurance for you as a courtesy.
- We will provide guidance in getting your bill paid, if necessary.

YOUR RESPONSIBILITIES:

- Please know and understand your insurance coverage.
- Please pay your balance or deductible, co-payment or co-insurance at the time of check-in.
- Please read and keep your Explanation of Benefits statements from your insurance company.
- Please follow up promptly with claims that are not paid by your insurance company, or you will be billed directly for them.

I HAVE READ AND UNDERSTAND THE STATEMENTS ABOVE.

CONSENT FOR TREATMENT

All health care professionals are regulated by laws and boards. These health care professionals are required to give you, the patient, advance notice of any care risks, because health care is not an exact science. It is not reasonable to expect any doctor to foresee all risks and/or complications. Informed consent information regarding any risks such as paraplegia, quadriplegia, brain damage, stroke, disc injury, breaks, fracture, dislocations, drug reactions, death or loss of function of any organ or limb or disfiguring scars associated with physical care, drugs, surgery and/or treatment is an undesirable result, but it does not necessarily indicate an error in clinical judgement. No guarantee of cure or results has been made to you, the patient in the clinic. Your care may involve the making of recommendations based upon facts known to the doctor at this time. Chiropractic care does not use drugs or surgeries. The practice of chiropractic can include exams and diagnostic testing. In some cases, the utilization of specialized instrumentation, lab tests, radiological exams, nutritional advice, rehabilitation, physical therapy, etc.

There are special procedures unique to chiropractic: the chiropractic adjustment, chiropractic manipulative therapy, CMT. Adjustments are made by chiropractors to correct and/or reduce or stabilize vertebral or extremity aberrant motion. The goal of chiropractic health care is to reduce or stabilize the nerve interference, caused by the aberrant motion of the joint and surrounding tissue structures. Adjustments are usually performed by hand but may be performed by hand guided instruments. An adjustment is the application of a specific force applied to a segmental contact point, usually on a vertebra, to reduce or stabilize the joint and its surrounding environ. You should understand the benefits of chiropractic health care, but you also need to be aware of some of the limited inherent risks. These occur seldom enough to contraindicate care but should be considered in your informed decision to receive chiropractic care. The risks may include musculoskeletal sprain/strain, disc injuries, dislocations, fractures, neurological deficits, Horner's Syndrome, vertebral artery syndrome, stroke, etc. The chances of this occurring are estimated by experts to be approximately only 1 per 400,000 treatments to 1 per 1 million treatments.

The purpose of Primary Care is to promote natural health. Since there are so many variables, it is difficult to predict the time schedule or efficacy of the procedures. Sometimes the response is phenomenal. In most cases, there is gradual but quite satisfactory response. Occasionally, the results are less than expected. Two or more similar conditions may respond differently to the same specialized care. It depends on the patient's nervous system and body balance. Many medical failures find quick relief through this specialized health care science. The fact is that the Science of Acupuncture, Chi, Chiropractic, Osteopathy, and Physical Medicine may never be so exact as to provide definite answers to all problems; all make great studies in alleviating pain, controlling disease and balancing the body.

Please discuss any questions or problems with the Doctor(s) BEFORE signing this consent for treatment statement of policy.
I HAVE READ AND UNDERSTAND THE FOREGOING. I AGREE TO THE SPECIALIZED CARE AND I HAVE NO EXPECTATIONS OF ANY ABSOLUTE RESULTS.
